DETAILED ACTION
EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 38: On line 1, delete "38".

On line 1, insert "37" between "claim" and ",wherein".

Allowable Subject Matter

2. Claims 32-45 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding claim 32, Hoffman et al. (7,103,386) discloses a method for dynamically directing a wireless repeater, the wireless repeater having a processor, data storage, a mobile station modem, and an antenna, the method comprising: (a) the processor causing the antenna to sweep over a coverage area through increments and to thereby wirelessly receive signals; (b) at each increment, the mobile station modem determining a signal-to-noise ratio of the received signal; (c) the processor storing in the data storage the determined signal-to-noise ratios per increment; (d) the processor determining which increment has a strongest determined signal-to-noise ratio and responsively causing the antenna to radiate at the determined increment. The instant invention discloses (a) the processor causing the antenna to sweep over a coverage area through increments and

to thereby wirelessly receive forward link signals; (b) at each increment, the mobile station modem determining a signal-to-noise ratio of the received forward link signals (c) the processor storing in the data storage the determined signal-to-noise ratios per increment (d) the processor determining which increment has a strongest determined signal-to-noise ratio and responsively causing the antenna to radiate reverse link signals at the determined increment; and (e) repeating steps (a)-(d) at least once, to dynamically redirect the antenna to radiate at a different increment. The above novel features are neither taught, suggested nor made obvious by Hoffman et al or any other prior art of record. Claims 33-36 are rejected based on their being dependent on claim 32.

Regarding claim 37, Hoffman et al (7,103,386) discloses a wireless repeater comprising: a donor antenna; a processor; data storage; a mobile station modem; wherein the processor is programmed to cause the donor antenna to sweep across a coverage area through increments so as to wirelessly receive signals; wherein the mobile station modem receives signals from the donor antenna and identifies characteristics of the received signals; wherein the processor is programmed to store in the data storage the identified characteristics per increment and to use the identified characteristics to select a given increment; wherein the processor is programmed to then cause the donor antenna to radiate signals at the selected increment. The instant invention discloses wherein the processor is programmed to cause the donor antenna to sweep across a coverage area through increments so as to wirelessly receive forward link signals from a plurality of base stations; wherein the mobile station modem

receives the forward link signals from the donor antenna and identifies characteristics of the received forward link signals; wherein the processor is programmed to store in the data storage the identified characteristics per increment and to use the identified characteristics to select a given increment; wherein the processor is programmed to then cause the donor antenna to radiate amplified reverse link signals at the selected increment. The above novel features are neither taught, suggested nor made obvious by Hoffman et al or any other prior art of record. Claims 38-45 are rejected based on their being dependent on claim 37.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
